# **Introduces A New Handrail Assembly Hardware Kit....**

The L.J. Smith **Rails2Post Connector™** (LJ-3077) improves the connection of two rails to a post to post newel on a level run. This kit provides a quicker and stronger installation than rail bolts and is simple to use when a “flush-mount” application exists. It is designed to be used with 3”, 3¼” and 3½” newel posts.

***Ask your L.J. Smith salesman for additional information!***
